WASHINGTON NEWS.

Opinions Strong that McKinley Would be Elected.

Desertions from the Army-Merritt affectionate people under kind treat-Mas Good Opinion of the Filipinos.

[From Our Regular Correspondent.] WASHINGTON, Nov. 2, 1900,-Never before has public sentiment here, regardless of individual political preference, been so nearly unanimous at the close of a presidential campaign, as to what the result will be, as it is this had Filipino servants, who were extime that President McKinley will be reelected. This isn't because everybody wishes it that way, but because of the seemingly overwhelming evidence that it will be that way. A hotel clerk voiced this sentiment when he said: "The talk of our guests is all one way-McKinley. In our little chats with them there seems to be but one sentiment, and that is of republican success. It doesn't make much difference from what state he comes, outside of the south, the traveling man, or busines man, or tourist, voices the sentiment. It would seem to me that this unainmity of opinion from the strangers within our gates, hailing from all parts of the union, is of the greatest significance. It was not so in 1896. Bryan men were plentiful then and they made our lobby resound with their resonant tones."

It is evident from extracts from advance sheets of consular reports that Dr. Vosberg-Rekow, who was a German delegate to the industrial exposition held in Philadelphia last year, and who spent months in investigating our industrial conditions, is alarmed at our rapid growth. He has written a book on the "Commercial Treaties of 1893." in which he declares there are but three great world powers-Great Britain, Russia and the United States. Men have been thrown into prison in Germany for saying less. He regards the United States as the most powerful rival of Germany's economic future, and in effect, if not actually, advises a union of European nations against us. only one mile from Jerome. Active For instance, he says: "The fear of work has already been commenced. the American industrial invasion The board of directors at a meeting hould lead us and all European countries to a closer union with Russia, which country, with its newly acquired territories in Asia, could reimburse our export trade for the loss of the American and other foreign markets, and, in addition, furnish us with the in-

dispensable raw materials." Russian petroleum and trans-Caspian cotton may be made substitutes for the American staples, and while Russia might not altogether replace the United States as a source of supply of raw product, we should strive to become independent of the Americans and teach them that a change of policy to-

wards us is requisite. Politicians are always surprised to see a man give up an office except under compulsion or to step into another carrying a larger salary. They were given a severe jolt this week by Mr. J. W. Yerkes, republican candidate for governor of Kentucky, who came reason of this apparently slight difto Washington to hurry the acceptance of his resignation as collector of internal revenue for the eighth Kentucky district, which had been in the hands of the treasury authorities for some time. Although there was neither law nor precedent compelling him to resign because of his candidacy for governor, Mr. Yerkes insisted, and his resignation was accepted, to take effect No-

vember 1. The annual report of the Adjutant General of the Army, for the fiscal year ending June 30 last, shows that a. the desertions from the army were equal to almost 20 per cent of the enlistments-there were 19,549 enlistments and 3,993 desertions. The report also shows that the number of rejections made by recruiting officers during the year for legal, mental, moral or physical reasons were 69,694. - about 78 per cent of those offering to enlist. The "army canteen," officially known as the "post exchange," also gets a boost from the adjutant general. who says that reports from the Philippines, Cuba and Porto Rico "indicate that the post exchange has become an absolute necessity." The report shows that the post exchanges did a business amounting to \$1,915,862, with a net

profit of \$464,504. The advance estimates of the population of the country were very close to the official figures given out this week-78,295,220. The total population in 1890 was 63,069,756. Uncle Sam has no reason to complain at the growth of his family during the past ten years. An increase of nearly 21 per cent is unprecedented in the growth of large nations. At this time the United States ranks fourth in population among the nations of the world, China being first, India second and Russia

therd. Germany is fifth, but it only has 52,279,901.

Gen. Wesley Merritt, who was the first American commander in the Philippines, is in Washington, with his opinion of the Filipinos, of whom he said: "They are a very tractable and ment. They are thoroughly susceptible of discipline, and would make better soldiers under our rule than they did under the Spaniards. There were three regiments of Filipicos in the Spanish army, stationed in the Philippines, of which one regiment deserted with their arms. These guns formed the nucleus of weapons for the Filipino forces. Some of our officers ceedingly faithful and affectionate. In several cases when these officers returned to the States their Filipino servants were eager to return with them. There were vagrants and villains among them occasionally, but they were exceptions. They would sleep outside the door, could be trusted, and were steadfast in their loyalty."

ALMOST EVERY MINER AT WORK

The Great Anthracite Strike Appears to be Wholly Over.

HAZLETON, Pa., Nov. 7 .- The strike of the anthracite miners can be said to be a thing of the past. Nearly every man who was out is now at work, and in many mines enough coal was mined to warrant the starting of the breakers. The outbreak at Cranberry is settled, and at Milnersville, where it was expected there would be a long fight, an agreement was reached and the strippings are being worked. It is not likely that President Mitchell will return to Hazleton.

Verde King Copper Company.

Some prominent citizens of Los Angeles have formed another big copper company, having bought outright ten full mining claims outright ten full mining claims (200 seres) adjoiring the great United Verde Copper company, owned by Hon. W. A. Clark, at Jerome, Arizona. The Verde King property lies only one mile south of the smelter and works of the United Verde and Wednesday elected Charles J. George president, Elmer C. Chapman vice president, M. C. Nichols treasurer, Byron W. Riley secretary, with Davis Richardson, a prominent mining man and engineer of Sonora, as consulting engineer. It is thought that the development stock will not be offered for sale here, although a number of applications have been made for large blocks of stock .- Los Angeles Mining Review.

Forces of Gravity Not Always Same. It has been found that the force of gravity at sea level is not constant at all points on the earth's surface-that is a pound is not literally a pound everywhere. In some recent observations with delicate instruments C. A. Almonetti has found that in 11 towns of Italy the earth's attractive force varied by one part in 10,000. This means that a standard pendulum (39.09 inches in length), which beats seconds, would lose 26 minutes each year by ference in the force of gravity in these towns of Italy. A ton of gold, if weighed on a spring balance, would differ in value by the loss of weight theoretically by \$50 at localities where the gravity was a minimum. The explanation given of these variations of gravity is the uneven massing of the material of the earth's crust .- Little Chrosicle.

the fact that comfortable household management on small means is an art that should be studied. It cannot be picked up haphazard any more than any other art which produces practical results, and to obtain the greatest amount of comfort from the smallest amount of money should be the result of all true economy.

DOG GOES THROUGH PUMP.

Terrier is Sucked in and Bjo Uninjured at Bridgeport Station

A terrier belonging to Engineer Me-Arthur went through the pumps of the Bridgeport pumping station at Chicago the other day and was none the worse for its trip. It had been playing on the footbridge over the race, or intake, from the south branch when it tumbled into the black waters that

flow from the stock yards region. Five of the pumps were in operation and a swift current was running inward. Before the dog could reach the narrow bridge around the basin he was sucked under the arch into the center pump well. A fireman who saw the plight and apparent end of the beast walked around to the engine house to

tell the engineer of the mishap. McArthur looked into the seething waters pouring from the pump and saw his dog vomited forth. It fell into the canal basin and floated swiftly away. A few minutes later the dog, wet and staggering, came into the engine room and for half a day lay sick on a pile of waste, finally recovering completely.

COUNTY RETURNS

The Returns Are Now Almost Complete.

Bisbee Polls a Big Vote---County Gives a Majority for Mark Smith.

The battle of the candidates in Bisbee has been unusually interesting, not ! alone on account of the various interests involved, but from the fact that the men on both tickets are well known, with but few solitary exceptions, possessed of the necessary qualifications to furnish good official timber, and have many personal friends who fought hard for their choice.

In some instances the progress of the voting reveals a choice of the voters that is somewhat surprising, and candidates who were looked upon as good citizens, whose interests are largely placed right in the midst of this district are behind in the voting.

The number of votes cast in Bisbee, about half of the total number of county votes, naturally take considerable labor and time in counting, and the geles men. votes cast for each candidate have been watched through the night with anxlety by the candidates and their friends.

The result is now known as far as Bisbee is concerned, and indeed the returns from the important precincts are at hand. The victory is with the been found carrying gold, copper and democrats, as far as known.

The county will be represented by a conservative body of officials, and no run an incline shaft 180 feet and by George, Helen. Howard, Edwin doubt its best interests will be con-

Much disappointment is naturally felt by candidates who have been de an election.

The most important precincts are now in, and the result is known well enough not to be altered, except perhaps in one instance.

A table of the returns from the county precincts, as far as known, is published in our columns. This will give all information with regard to the political bias in different parts of the Hall tomorrow at 1:30 p. m. to attend county, and will make a valuable memoranda for the hext election. The table will be filled in and republished as returns are received.

There are various causes to be as signed for the defeat or victory of a candidate in certain precincts which may be of a local nature, or may have been spread abroad for political purposes. These chances are taken with all others in playing for the stake of a public position, and although slander should never be perpetrated, yet it is thought by some that all is fair in politics.

M. D. Scribner has polled the highest vote in Bisbee. C. C. Warner is

next in the total list in this town.

THE COUNTY ELECTION this precinct where he has many friends.

S. K. Williams and Mr. Wilcox are tied for first place for the position of Must Crush the Carlists -- Rebel justice of the peace.

MINING NEWS.

W. Mill Williams is working a prospect in the Pinto Creek district, which shows up well. There are about 25 tons of good shipping ore on the dump and as much mere blocked. If the ore chute continues this prospect will undoubtedly make one of the paying mines of this section.

The Draper group of gold mines, two miles down the river from the Sheepstrail mill, at Pyramid, is being worked by a force of men and shows up a very rich vein of gold ore. The ledge is nearly flat, very much decomposed and exceedingly rich in coarse gold. The last steamer from Needles left a large lot of lumber and supplies at the demonstrations at Villafranca are the mine.

Across the river from Pyramid there is much activity. The Homestake 30stamp mill is running night and day. A new company is opening up a group of mines near the Homestake called the Fay group, which is owned by Los An-

Jerome Reporter: The Mingue combeing done in several places with considerable success. A 6x8 shaft has been sunk 115 feet, in which rock has silver, assays running as high as \$50 in gold and \$600 in silver. They have drifted 150 feet from it. The first galans struck in the immediate vicinity was found in this shaft; it was 50 per cent fine and carried values in copper, feated, but it is certain that some one gold and silver. President Thomas must suffer, There is, as a rule, no says the new 40-horse power boiler will greater uncertainty than the result of be ready to fire in a few days. This will furnish sufficient power for their several hoists, and, of course, be a great saver of labor in hoisting. Surveys for patents are now being made, and when this work is completed it is the ntention to increase the force of their

Attention, Rebekahs,

Bets on the results of the election were recorded with the provision that the articles were to be bought at home. They include hats, tailor made suits, shoes, ties, ladies tailor mades, etc. Over 100 of these were understood to H. C. Stillman leads for recorder in be bought at "The Fair."

DECLARE A SIEGE

Ranks Growing.

Strikers and Rioters Collected and Authorities Are Alarmed at the Outlook.

Moscow, Nov. 7. - Despite the strict censorship exercised by the Sanish authorities on all news from Spain, the news has leaked out from the Spanish legation at St. Petersburg that the province of Catalonia in Spain will be at once declared in a state of siege. It is also said that the Carlists' partisans are increasing in Madrid every day.

Four thousand strikers and rioters are gathered at Manresa, a little manufacturing town near Barcelona, and alarming the authorities.

WILL PAY BONI'S DEBTS.

Goulds of New York Sald to be Ready to Contribute.

NEW YORK, Nov. 7 .- On the authority of an "intimate friend of the late Ja; Gould," the Evening World topany has now twenty men employed on day announces that the debts of Count their grounds. Development work is Boni de Castellane will be paid in fuil by the Goulds at once.

"The scandal attending the claims amounting to \$4,000,000 against the spendthrift husband of Countess Anna is to be stopped," the paper adds, "A lump sum probably will be contributed and Frank Gould to wipe out these debts, as they consider the honor of the Gould family is involved.

"Incidentally it was elicited that the Gould millions have nearly doubled since Jay Gould's death, and Anna's share is nearly \$18,000,000, and her income near to \$1,000,000 than to \$600,000. as heretofore stated. The total value of the Gould estate is now \$125,000,000

ORDER TO AMERICANS.

Pittsburg Company Successful Bidder Over European Competitors.

LONDON, Nov. 7 .- In competition with European manufacturers an American steel company today obtained an order for £1,000,000 (\$5,000,000) worth of rolling stock for South African rail ways. Wehrner, Beit & Co., one of the great South African mining corporations, asked for a bid on coal cars. to be delivered to the mines at the earliest possible date. The Pressed Steel Car company of Pittsburg is the successful bidder. The American company not only made a bid a third lower than any other company, but beat the best European bidder in time by eight months.
